Target Species	Human	
Product Form	Purified IgG, liquid	
Antiserum Preparation	Antiserum to $\beta$ 2-Adrenoceptor was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.	
Immunogen	A synthetic phosphopeptide derived from human $\beta$ 2 around the phosphorylation site of Ser356.	
Storage Buffer	Dulbecco's PBS, pH 7.4, with 150 mM NaCl, 0.02% sodium azide	
Specificity	Serine356 (S356) is a major phosphorylation site of the $\beta$ 2 adrenoceptor. The pS356- $\beta$ 2 antibody detects phosphorylation in response to high- and low-efficacy agonists but not after PKC activation. S355 phosphorylation is primarily mediated by GRK6 and is a key regulator of $\beta$ 2 desensitization, $\beta$ -arrestin recruitment and internalization.	
Guarantee	12 months from date of dispatch	
Storage	Store at -20°C. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody.	
Regulatory	For research purposes only
