	Dilution						
Immunohistochemistry	1:100						
Western Blot	1:1000						
Target Species	Human						
Product Form	Purified IgG, liquid						
Antiserum Preparation	Antiserum to human V1B was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.						
Immunogen	A synthetic peptide corresponding to distal end of carboxy-terminal tail of human V1B.						
Storage Buffer	Dulbecco's PBS, pH 7.4, with 150 mM NaCl, 0.02% sodium azide						
Specificity	The non-phospho-V1B Receptor Antibody is directed against the distal end of the carboxyl-terminal tail of human V1B. It can be used to detect total V1B receptors in Western blots independent of phosphorylation. The non-phospho-V1B antibody can also be used to isolate and enrich V1B receptors from cell and tissue lysates. It also detects V1B in cultured cells and tissue sections by immunohistochemistry.
